### SPECIAL NOTICE

See page 5 of the February 1960 issue of this report for "Notice of Possible Discontinuance of Separate Summarized Totals For United States Export and Import Trade with the Dependencies of Western Europe".

## UNITED STATES FOREIGN TRADE

SUMMARY REPORT  
FT 950-E

APRIL 1960

FOR RELEASE  
June 16, 1960

## EXPORT TRADE BY COUNTRY

The Bureau of the Census, Department of Commerce, announced today that the increase in United States exports of domestic and foreign merchandise from \$1,751.2 million in March to \$1,822.9 million in April resulted from increases in exports to the following areas: Western Europe, from \$582.0 to \$608.5 million; Latin American Republics, from \$298.6 to \$317.1 million; Canada, from \$343.9 to \$352.6 million; and all other countries, from \$464.1 to \$476.3 million. Exports to the dependencies of Western Europe dropped slightly from \$63.6 to \$61.3 million. Data on exports of Special Category commodities, which rose from \$175.6 to \$189.4 million, are included in the above-mentioned totals.

The Bureau stated that, with Special Category commodities excluded, exports of domestic and foreign merchandise rose from \$1,575.7 million in March to \$1,633.5 million in April. Exports to O.E.E.C. countries rose from \$474.4 to \$503.0 million; Latin American Republics, from \$290.4 to \$306.7 million; and sterling area countries, from \$279.7 to \$288.8 million. Increases were reported in exports to all continents except Asia.

The rise in exports to Europe from \$493.3 million in March to \$526.4 million in April reflected increases in exports to individual countries of this continent as follows: Spain, from \$5.6 to \$14.1 million; Switzerland, from \$17.8 to \$25.7

million; Poland and Danzig, from \$4.5 to \$12.4 million; Turkey, from \$10.6 to \$18.3 million; Italy, from \$47.8 to \$55.4 million; United Kingdom, from \$93.5 to \$98.5 million; and Sweden, from \$22.2 to \$27.0 million. However, exports to "Belgium and Luxembourg" and France declined from \$41.9 to \$37.0 million and from \$53.1 to \$48.7 million, respectively.

Exports to South America climbed from \$165.3 to \$180.6 million owing chiefly to increases in exports to Uruguay, from \$5.5 to \$11.9 million and Chile, from \$12.9 to \$16.7 million. An increase in exports to Canada, from \$337.1 to \$351.3 million, accounted for most of the gain in exports to North America from \$488.1 to \$502.7 million. The increase in exports to Africa from \$65.0 to \$72.5 million was due in part to an increase in exports to the Union of South Africa, from \$22.6 to \$26.7 million. Exports to Australia and Oceania advanced slightly from \$28.9 to \$31.3 million.

Meanwhile, exports to Asia fell from \$335.1 million in March to \$320.0 million in April as decreases in exports to the Republic of Korea, from \$18.5 to \$10.6 million; Republic of Indonesia, from \$9.6 to \$4.3 million; Japan, from \$115.7 to \$111.4 million; and India, from \$67.4 to \$64.0 million were partly offset by increases in exports to Pakistan, from \$11.4 to \$17.2 million and Israel, from \$8.2 to \$12.4 million.

## EXPLANATION OF STATISTICS

**COVERAGE:** Export statistics include government as well as non-government shipments to foreign countries. The export statistics, therefore, include Mutual Security Program military aid, Mutual Security Program economic aid, and Department of the Army Civilian Supply shipments. Separate figures for Mutual Security Program military aid are shown in the footnotes of this report. Shipments to United States armed forces and diplomatic missions abroad for their own use are excluded from export statistics. United States trade with Puerto Rico and United States possessions is not included in this report, but the export trade of Puerto Rico and Hawaii with foreign countries is included as part of the United States export trade. Merchandise shipped in transit through the United States between foreign countries is not included in export statistics.

**COUNTRY DEFINITION:** Although the country of destination is defined as the country of ultimate destination or the country where the goods are to be consumed, or further processed or manufactured, the statistics do not always reflect this definition, as the shipper may not know the ultimate destination of the shipment. In such cases, the shipments are credited to the last country, as known to the exporter at the time of shipment from the United States, to which the goods are to be shipped in their present form. It follows, therefore, that the statistics will tend to be overcounted for shipments to transshipment or merchanting countries and undercounted for other countries. As explained in the footnotes to the table, exports of Special Category commodities are not included in any of the published country totals, for reasons of security.

**VALUATION:** The valuation definition used in the export statistics is the value at the seaport, border point, or airport

of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Transportation and other costs beyond the United States port of exportation are excluded. However, in some instances the valuation may not be reported in accordance with this definition, particularly where the export value is difficult to determine or must be estimated. None of the values have been adjusted for changes in price level.

**EFFECT OF SAMPLING:** The value of export shipments individually valued at \$100-\$499 (about five percent of total export value) is estimated by sampling. Effective with the statistics for January 1960, the previous sample ratio of 10 percent has been increased to a 50 percent sample for countries other than Canada with the 10 percent sample being retained for Canada. The estimated values are distributed among the area, continent and country totals. For the 1960 export figures in this report, the probable variability due to sampling is less than \$50,000 or less than one percent. For the 1959 figures, to probable variability due to sampling is less than \$50,000 or less than two percent of the individual totals shown. The largest variation from rounding of figures is \$50,000. For further information regarding sampling procedures, see the September 1953, February 1954, January and June 1956, and the October-December 1959 issues of Foreign Trade Statistics Notes.

Further information regarding coverage, country definition, valuation, etc., is contained in the "General Explanation" in foreword of Report No. FT 410. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.
